
The world's first sustainable roofing solution extends life 5 years quickly, safely and affordably.
ROOFMAXX™
More Life. Less Money. Guaranteed.

# Frequently Asked Questions

**Q**: When should I consider sealing my shingles?
**A**: There are a few factors to consider:

1. If your shingles are ten years or older
2. Protective granule coating shedding into gutters
3. Staining, streaking, or algae growth is present

**Q**: What is Roof Maxx's warranty?
**A**: Roof Maxx comes with a 5 year pro-rated warranty. Should you need to replace your roof during the warranty period you will be refunded the unused amount. The warranty is fully transferable, a great selling tool if you're considering selling your home.

**Q**: What happens if it rains after Roof Maxx is applied?
**A**: Roof Maxx quickly penetrates the shingle and rain isn't a problem within 30 minutes of application.

**Q**: Is Roof Maxx safe for my family, pets, home and landscaping?
**A**: Yes, Roof Maxx is 100% safe because it's an all natural bio-based formulation.

**Q**: Will the Roof Maxx treatment change the appearance of my shingles?
**A:** Yes, but in a positive way. Roof Maxx will bring your shingles back closer to their original color because the oil re-saturates your shingles causing them to darken a few shades.

**Q**: Can I buy Roof Maxx and apply it myself?
**A**: No, Roof Maxx must be applied by an approved dealer.

More Life. Less Money. Guaranteed.

# We make it easy to protect your home and family at a price you'll love.

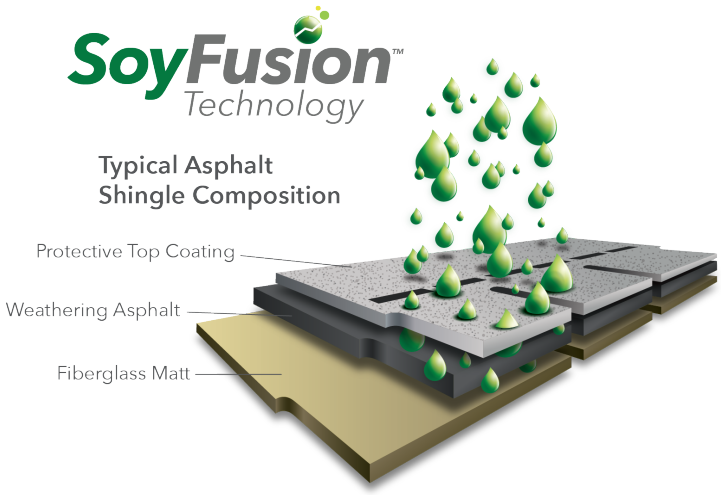

ROOF MAXX™
More Life. Less Money. Guaranteed.

A unique, scientifically formulated all-natural shingle sealer-rejuvenator that's 100% safe for people, pets, property and our environment.

## Keep your roof looking up by slowing down the aging process.

**When installed, your roof shingles have essential oils in the asphalt that allow for extreme movements called expansion and contraction. Proper expansion and contraction is critical for a healthy roofing system because roof temperatures can climb to 140 degrees during the hot summer months.**

**Rain showers quickly cool the roof causing rapid contraction, known as thermal shock. As the rain passes, the roof temperature quickly climbs again. As your roof shingles age, the essential oils begin to dry out, causing the asphalt to become brittle. These repeated cycles slowly break the roof apart.**

**Roof Maxx uses Soy-Fusion Technology™ which allows millions of micro beads of bio-based soy oil to penetrate the top protective gravel coating into the shingle's essential layer of waterproofing asphalt. Roof Maxx's rejuvenating oil quickly restores flexibility and waterproofing of the asphalt ensuring maximum life and protection.**

# Roofing's Environmental Impact and The Benefits of Roof Maxx

The amount of waste generated by roof replacement is a growing concern. Asphalt shingles, the most popular roofing material in the United States and Canada, are one of the least environmental friendly roofing options.

Asphalt is petroleum based and energy intensive to produce. Waste generated from roof replacements contributes up to 10% of construction demolition debris in landfills.

With continuing pressure to reduce the size of landfills and regulate the types of waste streams that go into them, extending roof life drastically reduces landfill waste and valuable natural resources.
